

## Project Description

Butler and Neuhoﬀ (2008) explored the policies aimed at promoting wind power in the UK and Germany. They find that all the policies they investigate have serious pros and cons - no single policy can combine economic efficiency and ecological goals.

**OUR APPROACH** is to extend this descriptive analysis to include Lithuania, and also extend the analysis to include other sources of renewable energy. Our aim is to provide economical efficient policy suggestions for Lithuania, or any country at an earlier stage of renewable energy adoption, based on the experiences from UK and Germany.

## Time Schedule

- *September 20.*: Bachelor thesis contract signed off by supervisor.
- *October 1.*: We will have finished literature search and found relevant data and have written the introduction.
- *October 22.*: Overall data analysis and descriptive part finished.
- *November 5.*: We will have finished writing.
- *November 11.*: Proofreading completed.
- *November 12.*: Hand-in.
